

B4219

a nej

b ja

c ja

d nej

 $k < 1$

$$b) S_n = a_1 \frac{(1 - k^n)}{1 - k}$$

$$S_{12} = \frac{64 (1 - 0,75^{12})}{1 - 0,75}$$

$$= \frac{64 (1 - 0,75^{12})}{0,25}$$

$$= 256 (1 - 0,75^{12})$$

$$= 256 \cdot 0,968...$$

$$= 247,8908539$$

$$\approx 248$$

5179

54219 of 32, 40, 50, 62,5

$$\frac{40}{32} = 1,25$$

$$S_n = a \cdot \frac{(k^n - 1)}{k - 1}$$

$$= \frac{32 \cdot (1,25^{12} - 1)}{1,25 - 1}$$

$$= 128 \cdot (13,551 \dots)$$

$$= 1734,645149$$

$$\approx 1735$$
